**Subject:** West Lake Landfill  
[Magnus Brochure.pdf](#)

Hello Chris:

I wanted to contact you to see how our firm, Magnus Pacific, could get on a bidders list for the upcoming work at the West Lake Landfill.

Magnus Pacific Corporation, with headquarters in Sacramento, California and regional offices in Colorado, Michigan, Florida, Texas, and Washington is a full-service environmental and geotechnical construction company with capabilities in hazardous waste site remediation and specialty geotechnical construction. The key members of our management team have more than 150 years of combined field experience performing a wide range of successful geotechnical and environmental remediation projects. This experience allows Magnus Pacific to deliver "Best in Class" technical solutions and implementation strategies at the best possible value. Our experience includes an extensive history constructing slurry cutoff walls, developing mix designs, and executing design/build projects. Magnus Pacific has the capability to perform single projects with values in excess of over \$40 million.

Members of our Team in Denver worked from 1999 thru 2010 at the Rocky Mtn Arsenal, located in Commerce City, CO. The RMA was a 25 square-mile Superfund Site that was highly contaminated. We also set a record in health and safety by going over 115 days of zero incident performance while on-site, which helped the RMA achieve OSHAs VPP Star Status. Our team was involved in demolition, remediation, landfill operations (both hazardous & Non-haz), construction, landfill capping, slurry walls, high profile high hazard high odor excavations, transportation, etc. We have over 150 yrs. Of combined experience with projects like the West Lake Landfill.

Please feel free to contact me at 719-331-9306. Also, let me know if I may be able to come out and tour the site sometime. I would really be interested in doing that. I have attached a brochure on our company to help give you more of an understanding of what we do.

I look forward to hearing from you soon.

Sincerely,

***Carl Crews***
